

# Nuway Grid

**100%**  
**Recycled Extruded Aluminium**

**Nuway Grid** Entrance Matting System is a single sided primary rigid aluminum entrance matting that is attractive, tough and versatile. Every **Nuway Grid** mat features **100% recycled**, extruded aluminum interlocking carrier sections for durability, with infill strips joined together by rubber double connecting strips.

### Considerations

As with all aluminium matting systems of this type, in very brightly lit areas, the strong contrast between a light aluminium scraper bar and a dark wiper strip can sometimes create a strobe effect which should be avoided. To prevent disorientating pedestrians affected by this type of visual disturbance, consider using a less contrasting insert.

## Nuway Grid

**100%**  
**Recycled Extruded Aluminium**

The aluminium sections have a low-luster anodised finish to comply fully with DDA requirements. Nuway Grid Entrance Matting is constructed to spread heavy loads & to offer long lasting effective performance in demanding locations.

The carrier sections can be coupled with infill materials providing maximum design flexibility, allowing beautifully colour co-ordinated entrance areas to be created with primary & secondary matting products that are perfectly matched. These materials include strips of textile infill in 13 different colour ways drawn from the Coral classic, Brush Activ and Burford ranges. Other textile inserts from the Coral range are available to special order. Rubber inlays are also available, which allow grid mats to be used outside

Burford
