

C/S Pedigrid

44mm Aluminium Primary Entrance Matting

Designed exclusively for recessed installations, C/S Pedigrid® is a system of removable grille sections that allows water, dirt, and snow to fall between the heel proof treads into a drainable 44mm deep well below. The advantage of a deep matwell is reduced cleaning and maintenance.

C/S Pedigrid® is available in six different tread finishes for exterior and interior use and in a variety of colourways. It is purpose made to specific modular dimensions and shapes for your project.

The system is especially suitable for new construction, where there will be high footfalls such as passenger termini, shopping centres and hospitals.
